IF AVAILABLE, THEY HAVE BEEN ATTACHED. CLAIMANT RETAINED AN ARCHITECT TO DESIGN THE BUILDING, AND TO ADMINISTER THE CONTRACT FOR CONSTRUCTION. THE GENERAL CONTRACTOR SELECTED SUBCONTRACTORS FOR MANY PHASES OF CONSTRUCTION, INCLUDING INSTALLATION OF THE FIREPROOFING MATERIALS. (SEE ATTACHED CONTINUED RESPONSE)

19. How did you first learn of the presence of asbestos in the property of the Grace product for which you are making this claim?

AN ASBESTOS INSPECTION SURVEY WAS CONDUCTED, BULK SAMPLES WERE TAKEN, AND LABORATORY ANALYSIS DETERMINED ACM. ## BACKGROUND AND SUMMARY

### 1.1 BACKGROUND

The South Crowley Elementary School, Crowley, Louisiana, operated under the authority of the Acadia Parish School Board, has complied with 40CFR763 (Asbestos-Containing Materials in Schools), promulgated by the USEPA and effective December 14, 1987. The Inspection and Management Planning functions required by this rule were carried out by Poche' and Associates, Ltd./The Environmental Management Group, Inc. in the period of June 15, 1988, to May 1, 1989. The documentation contained herein complies with the requirements for Management Plans as detailed in 40CFR763.93.

### 1.2 SUMMARY

The South Crowley Elementary School complex consists of eight major construction phases:

1. Main Building (A): Steel frame and masonry construction; constructed in 1963; single story; approximately 18,124 S.F.
2. Cafeteria/Auditorium Building (B): Steel frame and masonry construction; constructed in 1963; single story; approximately 7,395 S.F.
3. Classroom Building (C): Steel frame and masonry construction; constructed in 1971; single story; approximately 7,092 S.F.
4. Classroom Building (D): Steel frame and masonry construction; constructed in 1955; single story; approximately 7,072 S.F.
5. Library Building (E): Steel frame and steel construction; constructed in 1967; single story; approximately 6,265 S.F.
6. Classroom Building (F): Wood frame and wood construction; constructed in 1950; single story; approximately 1,950 S.F.
7. Gymnasium Building (G): Wood frame and masonry construction; constructed in 1936; single story; approximately 8,127 S.F.
8. Storage Building (H): Wood frame and wood construction; constructed in 1953; single story; approximately 289 S.F.

The major sources of friable asbestos containing building materials (ACBM) in the facility consists of 35% chrysotile asbestos acoustic coating applied directly to the underside of the concrete roof deck. This material has been encapsulated with a spray applied cellulose and binder that serves as an encapsulating agent. The encapsulating process occurred in 1984. This material is in generally good to excellent condition

Dear Parent(s):

In accordance with Environmental Protection Agency (EPA) regulations, the school which your child attends has been inspected for friable (easily crumbled) materials which contain asbestos. Friable asbestos-containing material may cause health problems. A record of the inspection, a diagram of the location(s) of friable asbestos-containing materials, and a copy of relevant EPA regulations are available in the principal's office of the school. Also included is a Guide for Reducing Asbestos Exposure. EPA regulations state that it is important to note that friable asbestos-containing material need not be removed from schools once such material has been identified. Unless this material becomes loose and airborne, there is no danger.

At Cut Off Elementary, asbestos was found in the boiler room, and the content is 15%. All proper precautions, repairs where this substance becomes loose, and constant inspections are now being done by the Lafourche Parish School Board. Rest assured that all necessary work will be done to prevent any friable materials from becoming airborne. Please do not become alarmed over this letter. We are simply supplying information about a possible health hazard.

If you wish further information about this, I recommend you contact the principal of the school which your child attends, visit his office, and view the file on asbestos, which he has in his office. I'm sure any anxiety that may occur because of this correspondence can be eased or completely removed after your visit to the school.

In the event you wish further information about asbestos, please have the principal contact me, and I will be happy to meet with you.

Cordially yours,

Hank Barrios  
Director of Maintenance

HISTORICALLY, CLAIMANT HIRED AN ARCHITECT TO DESIGN THE BUILDING, BID THE CONTRACT PURSUANT TO THE PUBLIC BID LAWS, AND TO ADMINISTER THE CONSTRUCTION OF THE SCHOOL. THE GENERAL CONTRACTOR SELECTED ITS OWN SUBCONTRACTORS FOR ALL PHASES OF CONSTRUCTION. (SEE ATTACHED CONTINUED RESPONSE)
